

# Make bridge fun again, despite poor eyesight

*“What a change! Since starting using the Yellow Eyes playing bridge about 70 percent of the cards land where I can see them. Without Yellow Eyes it was only 5 percent. I take tricks based on my ability not only luck,” says Käte Schierwagen-Stenborg.*

***The Yellow Eyes have helped bridge players to continue with their hobby although their eyesight has become worse.***

Yellow Eyes is a silent reminder to the other players where to lay the cards. In the moment the card is played the Yellow Eye steer it to the right place on the table.

The visually impaired person doesn't have to remind the others and no questions about what cards have been played must be raised.

*Statements from the users:*

**Käte, 82:**

“The Yellow Eyes and helpful bridge players have made it possible for me to continue with bridge since my vision impaired in 2004. Bridge keeps the brain alert and I cannot think of a better hobby. I will continue to play as long as I can!”

**Ingegerd, 80:**

“The Yellow Eyes have been fantastic to me! They look fun and others perceive them positively. I always use them. Everybody understands immediately how it works, only some elderly men have difficulties remembering to put the card on the Eye but they are rather few. No one is snotty. I have used the Yellow Eyes since 2005 and it is wonderful to have them!”

**Lisa, 85:**

“I took up bridge again in 2006 when I couldn’t read anymore, but I didn’t think that it would be possible for me to play other than at home, but now I am also playing at the club every week. Thanks to the Yellow Eyes I don’t have to disturb the concentration by talking. The game shall be quiet and it goes fast.”

Katarina Stenborg is a member of the Gothenburg Inventors Federation and the Swedish Bridge Federation.

Her invention, the Yellow Eyes, is an aid that will help bridge players to continue to play bridge even if they get affected by macula degeneration or other diseases that make their vision impaired.

**A set of Yellow Eyes; €10  
+ postage (€2 within Europe)**
